FORMULA ONE-THE NEW FERRARI SF15-T TO BE REVEALED ON-LINE ON FEBRUARY 1ST

MORE HORSEPOWER AND SEXY

Modena, Italy, 29.01.2015, 00:37 Time

USPA NEWS - James Allison, new technical manager says that the new Ferrari will be quicker and better looking than the 2104 car. "We worked on developing the new power unit in order to obtain more horsepower and also on the aerodynamics of the Italian single-seater," stated Allison.

The rules of the next Formula 1 Championship are still young and there is plenty of room for improvement. "The guide lines for the new single-seater? Creating a more competitive car than the one raced in 2014, a very difficult year for our team." Allison continues revealing just enough before the official presentation of the new car due next Friday.

The task of the SF15-T will be to bring smiles back on all of the Ferrari race fans faces and the "Cavallino", as Ferrari is referred to in Italy, deserves to compete for the top standings in the F1 Championship.

What were the major changes brought to the car? "Our concern was to improve aerodynamics, the grip and above all to develop more horsepower making the car more competitive. We worked on the front end, the suspension and the wing."

Which is more important, horsepower or aerodynamics? "They are both essential-said Allison- we are working with new regulations therefore there's always room for finding new solutions in developing aerodynamics and the power unit."

When asked if he thought the new Ferrari was sexy Allison answered, "it's better-looking than last years car." We wish him and the team good luck for the upcoming Championship and of course, we can't wait to see the new SF15-T.
